

Enterprise Plan

Additional features and services

Last updated: April 2024

This document outlines additional features and services available to Enterprise Plan customers as part of your customized package. Please contact your account representative with any questions!

Momento savings plan

Savings plans offer discounted pricing when you pay up front for a specific rate of usage (the “usage reservation”) over a 1-year or 2-year period (the “commitment period”).

- **1-year savings plan: 20% discount** from on-demand pricing
- **2-Year savings plan: 40% discount** from on-demand pricing

The usage reservation is measured in either \$ / month (Topics) or \$ / second (Cache, Storage). Your account’s usage for a product in excess of the usage reservation is billed on-demand rates on a monthly basis, regardless of the commitment period.

Savings plans do not apply to pricing for support or add-ons.

Support add-ons

Migration support **from \$10,000**

Momento will develop a drop-in replacement SDK that minimizes the effort required for migration. Replacement SDKs include features such as dual writes and incremental cutover. Note that Momento products may not support the entire feature surface of every SDK.

Live event support **from \$1,000 / hour**

Momento will proactively monitor the status of your account’s workloads and engage directly with your team via live, dedicated communication channels.

Connectivity add-ons

VPC PrivateLink **\$100 / month each**

Momento will establish [PrivateLink](#) connectivity between a VPC and a cell of your choice.

VPC Peering **\$500 / month each**

Momento will establish [VPC Peering](#) connectivity between a VPC and a cell of your choice.

Deployment add-ons

Dedicated cell **from \$8,000 / month each**

Momento will deploy and operate a single-tenant cell in the region of your choice. Each cell supports multiple workloads, within the constraints of its peak performance characteristics. Peak performance characteristics for each cell are negotiable at additional cost. Regular on-demand usage charges apply for each Momento product within the cell.

High-Performance Namespace **\$250 / month each**

Momento will provision additional resources for a designated service namespace, which may improve performance characteristics for certain workloads. High-Performance Namespaces can be provisioned in both shared and dedicated cells. [Please inquire](#) to assess the potential performance impact on a specific workload.

Pinned Namespace **\$250 / month each**

Momento will provision additional resources within a single designated availability zone, which may improve performance or cost characteristics for certain workloads. Pinned Namespaces can be provisioned in both shared and dedicated cells. [Please inquire](#) to assess the potential performance impact on a specific workload.
